

**PLEASANT VIEW CITY
REQUEST FOR PROPOSALS
STREETLIGHT SUPPLIER**

**ADDENDUM 2
September 13, 2019**

The following questions and responses are hereby made part of the Request for Proposals.

1. How many units per each type of light? Residential, Corridor, and intersection
 - a. Currently, the City has a total of 177 street lights. The approximate distribution is 98 cobra heads (assumed intersection) and 78 residential lights. Corridor style lights are not currently differentiated.
 - b. A new plan will be created with the assistance and recommendations of the street light supplier to identify new residential light spacing and corridor light spacing (new).
2. What is the power input at each of the light locations?
 - a. Power input varies at current light locations. New power will be run to the new street lights as necessary.
3. Does the city provide roadway AUTOCAD file or PDF file for each type?
 - a. The City can provide Autocad, GIS, and/or pdf drawings of the City's street system.
 - b. The selected Supplier will provide Autocad files to the City once a final selection is made.
4. Are we able to use cobra head LED luminaire for residential and corridor types?
 - a. Cobra head style is limited to intersections.

QUESTION PERIOD IS NOW CLOSED.
